PROVIDING INNOVATIVE SOLUTIONS

A KEY PARTNER IN YOUR SUCCESS

Spectrum Planning, Inc. provides planning innovation, field engineering, system designs and innovative mapping services.

An extensive history of successful implementation and execution coupled with our collaborative and customizable approach can help you exceed the expectations of your customers.

The continued education and professional experience of our staff provides you with the resources you need to complete any successful project.

Let us put our combined 174+ years of experience to work for you today.

**DISCUSS YOUR PROJECT
NEEDS TODAY
636-757-1623**

"For the 'latest state of the art' network we chose Spectrum Planning because of their combined technical and operational experience. The result was an efficient, technically sound network design that will serve our company for many years into the future."

Kevin D. Smith - President / CEO
C3 Broadband Integration

"Whether it's a 3 mile project or 500 mile project, the accuracy and attention to detail Spectrum provides is never compromised."

Pat Howell - President / CEO
Universal Cable Services, Inc.

"For more than 15 years, Spectrum Planning has supported us in times when we needed to supplement our work force on projects. Spectrum Planning has supported a pole line survey with a very arduous project scope in a market covering approximately 20,000 poles. In addition they assisted with pole loading calculations in a number of software platforms. Spectrum Planning maintains the same work quality and ethics and customer support as NewCom, providing us a product which is accurate and delivered on-time. Spectrum continues to be our preferred strategic alliance partner."

Jim Petro
CTO/Partner
NewCom Technologies, Inc.
